

M Sathiesh

Systems Engineer NOC and Production Support

Bengaluru, India | +91 9071276172 | sathieshlingam16@outlook.com | github.com/Sathiesh1610 | sathiesh1610.github.io

PROFESSIONAL SUMMARY

NOC and Production Support professional with 6+ years of experience across production and non-production environments, with hands-on experience in Major Incident Management, Incident Management, Problem Management, Change Management, monitoring, troubleshooting, operational reporting and automation. Experienced with Splunk, Splunk Observability, Check_MK, AppDynamics, PRTG, SolarWinds, Park My Cloud, IBM Turbonomic, ServiceNow and Azure monitoring.

PROFESSIONAL EXPERIENCE

Systems Engineer NOC and Incident Management — INFOSYS | April 2022 – Present

- Provide NOC, Production and Non-Production Support within a 24x7 operational support model.
- Manage Major Incidents and P1/P2 incidents, assess business impact and coordinate resolver teams.
- Apply proactive and reactive approaches to Incident and Problem Management, including recurring-incident analysis and corrective/preventive actions.
- Coordinate Change Management across production and non-production environments, including deployments, patching and scheduled maintenance.
- Monitor environments using Splunk, Splunk Observability, Check_MK, AppDynamics, PRTG and SolarWinds; use Park My Cloud and IBM Turbonomic for operational visibility.
- Perform Azure Portal and AKS monitoring and preliminary troubleshooting using alerts, logs and resource-level investigation.
- Develop Python, PowerShell, Power Automate, HTML and React-based operational automation, reporting and dashboard solutions.

Project Engineer — Symbiotic Automation Systems Pvt. Ltd. | June 2020 – March 2022

- Troubleshoot industrial automation systems and investigated technical issues.
- Performed programming and system testing for industrial automation projects.
- Collaborated with cross-functional teams to resolve automation-related issues.

SELECTED PROJECTS

Health Check Dashboard — React/HTML: daily health collection with search, RED/AMBER/GREEN views and CSV export.

PULSE Report — HTML/JSON/email data: dashboard-style operational reporting for application health, jobs, issues, deployments and refreshes.

Server Service Automation — PowerShell: checks or starts selected services across multiple servers from a jump server.

Splunk Server Reboot Reporting — Python: processes exported Splunk logs and generates CSV reboot reports.

Operational Workflow Automation — Power Automate: tracks selected operational emails and archives reports.

TECHNICAL SKILLS

Production: NOC Support, Production Support, Non-Production Support, Major Incident Management, Incident Management, Problem Management, Change Management, Incident Triage, Troubleshooting, RCA, SLA Management, Deployment Support

Monitoring/ITSM: Splunk, Splunk Observability, Check_MK, AppDynamics, PRTG, SolarWinds, Park My Cloud, IBM Turbonomic, ServiceNow

Automation: Python, PowerShell, Power Automate, React, HTML, CSV Reporting, Excel/OneDrive Automation

Cloud/Infrastructure: Microsoft Azure, AKS Monitoring, Azure Alerts, Azure Logs, Windows Server, Ubuntu/Linux, SSH, UFW, Docker, Portainer, Networking Fundamentals

Foundations: Git/GitHub, MySQL Fundamentals, SQL Fundamentals, Cybersecurity/SOC Fundamentals

EDUCATION

B.Tech. Artificial Intelligence and Machine Learning — Birla Institute of Technology and Science, Pilani | 2025 – Present

Diploma in Electronics and Communication — MN Technical Institute | 2016 – 2019

CERTIFICATION AND TRAINING

Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft Certified: Security, Compliance, and Identity Fundamentals (SC-900) | ITIL Awareness | Data Privacy Compliance | Agile Operations | Python | SQL | PowerShell | Networking | Windows Administration | ServiceNow
